

Topic : COVID-19 crisis

Following the measures decided by French government in order to face the health crisis due to COVID-19, SOFRECO and Conseil Santé applied the required measures to all our activities, in order to preserve the health of our collaborators and experts and to ensure the continuity of our operations in France and abroad.

SOFRECO Group would like to express deep solidarity with all countries across the world which are afflicted by Coronavirus, particularly with countries where the Group brings its technical assistance in order to favor economic, social and sustainable development.

We stay aware in this context of deep health trouble. Our services keep working :

- A telephone hotline still works from 9.15AM to 6PM on our main number : 01 41 27 95 95
- Your usual correspondents work by telecommuting, and they can be reached through email or cellphone
- Department managers and their staff can be reached through email.

We all hope that this troublesome episode will end up as soon as possible.

Claude UNGERER
